5 Generation Pedigree Chart - Instructions and Examples

This booklet contains examples of how to fill out and use 5 Generation Pedigree charts. The numbering example is only one of a number of ways to number and continue the information. Also all pages can be printed

Included in this booklet is:

- A blank 5 Generation Pedigree Chart
- A 5 Generation Pedigree Chart with the instructions on each line for the type of information to be put on that line, if the information is available.
- An explanation on how to number the first chart as well as additional charts.

NOTE: This is one method of numbering charts other methods are used.

VERY IMPORTANT when gathering genealogy information to make a note of where you found the information, book name and number etc. etc. This way in the future you can retrace your steps if you have a question about the information.

How to number 5 Generation Pedigree Charts

This numbering example is only of a number of ways to number and continue the information.

Numbering Charts

You should number the first chart when you start.

The First chart will be Chart Number 1. (Upper right had corner)

- Line 16 says “cont.” add the number 2 so it reads “cont. 2” and means the information will continue on chart 2.
- Line 17 says “cont.” add the number 3 so it reads “cont. 3” and means the information will continue on chart 3.
- Line 18 says “cont.” add the number 4 so it reads “cont. 4” and means the information will continue on chart 4.
- Line 19 says “cont.” add the number 5 so it reads “cont. 5” and means the information will continue on chart 5.

Continue numbering the first page as shown above to the bottom of the chart number 1.

Continuing on to additional charts.

After filling in the information you are able to for a surname line and come to the end on the right side you will continue on a new chart. Example you have filled in all the information you can for that surname line and have reached “number 18” and “Number 19”. Note you must have a couple to continue on to a new chart.

Take two blank 5 generation charts. On line 18 it says “cont. 4” which means continue on a new chart with number 18 as the number 1 person on the new chart. Take one of the blank 5 generation charts and number it 4. Fill in the information from line 18.

Also on line 19 it says “cont. 5” which means continue on a new chart with number 19 as the number 1 person on the new chart. Take one of the blank 5 generation charts and number it 5. Fill in the information from line 19.

Each time you need to start a new chart using the above as examples.
